Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-49 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Scaman (5818239).

Regarding claims 1 and 24, Scaman discloses [see Fig. 4] apparatus and method for non-contact with the top surface electrical test of electronic substrates (substrate 11) comprising at least one electronic substrate (11) having top surface conductive features (TSM I/O pad 16) on a top side of electronic substrate (11) in electrical contact with bottom surface conductive features (pin pad 15) on a bottom side of electronic substrate (11), an ionization source (quartz plate 12) positioned above said top surface of electronic substrate (11) and connected to a first voltage source (shown in Fig. 7 as "V"), a fixture (plate 31) holding said substrate (11), an array of probes (pogo contact fixture 35) securely in contact with the bottom surface conductive features (15), a second voltage source [shown in Fig. 6 as V1 or V2] connected to array of probes (35) and current measuring electronics [not numbered but see Fig. 7] in contact with said array of probes (35) [see col. 5 line 46- col. 6, line 15].

Conclusion

4. Claims 2-23, 25-43 and 46 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. The following is a statement of reasons for the indication of allowable subject matter: regarding claims 2-23, 25-43 and 46, the reason for the allowance of the claims is due to the specific details that are claimed in the claims.
